NetWatcher

Advanced Security Made Simple - NetWatcher®

NetWatcher is a 24x7 network and endpoint security monitoring service designed specifically for ease of use, accuracy and affordability. With NetWatcher you can reduce risk and support your regulatory compliance security requirements. You get:

- An advanced, tightly integrated, security platform that only the Fortune 5000 could afford in the past
- Actionable threat intelligence on what malware exists in your enterprise and remediation guidance
- Visibility into the unintentional insider threat -- what your employees are doing on the network that is exposing the organization to exploit
- A Secure Operation Center with security analysts monitoring your data and reaching out to your team when necessary
- Easy to use customer portal designed for managers and IT, not for those hard to find security analysts, however you can go deep if you want...
- Real time scores for today's security situational awareness picture and the risk of exploit in the future

NetWatcher includes:
- ✓ Host Intrusion Detection System (HIDS) Endpoint Agents
- ✓ Network Intrusion Detection System (NIDS)
- ✓ Security Information & Event Management System (SIEM)
- ✓ Vulnerability Scanner
- ✓ Net-flow Analysis
- ✓ Actionable Threat Intelligence

Use Cases:
- ✓ Monitor Corporate Network and Assets for Security Exploits and Hygiene Issues
- ✓ Monitor AWS, Azure or Google Cloud Servers
- ✓ Monitor Off Network Assets (via Sensor-in-the-Cloud™)
- ✓ Regulatory Compliance-as-a-Service (HIPAA, FINRA, NIST, PCIDSS, GLBA, NYCRR 500, etc.)
