NetWatcher is a 24x7 network and endpoint security monitoring service designed specifically for ease of use, accuracy and affordability. With NetWatcher you can reduce risk and support your regulatory compliance security requirements. You get:

- An advanced, tightly integrated, security platform that only the Fortune 5000 could afford in the past
- Actionable threat intelligence on what malware exists in your enterprise and remediation guidance
- Visibility into the unintentional insider threat -- what your employees are doing on the network that is exposing the organization to exploit
- A Secure Operation Center with security analysts monitoring your data and reaching out to your team when necessary
- Easy to use customer portal designed for managers and IT, not for those hard to find security analysts, however you can go deep if you want...
- Real time scores for today's security situational awareness picture and the risk of exploit in the future

Why Partner with NetWatcher:

- You can add managed security to your portfolio with no upfront cost
 - *No cost for sales and technical training*
 - *No cost to join partner program*
- NetWatcher can become your tier II SOC
- ConnectWise integration and MSP Portal single pane of glass
- Customer Portal
- 2-month money back guarantee for every customer
- Contract is with you, not your customer
- Your cost is 23% off unpublished MSRP
- You get the NetWatcher service for your company for no cost if you have paying customers
- The only requirement is that you bring on 5 customers in the first 5 months of the relationship.
